

SPYROS KALIMERIS

Peloponnese, Greece | (+30) 6984575974 | kalimerisspyros@gmail.com | [LinkedIn URL](#) | [Github URL](#)
Languages : English (Fluent) | Greek (Native)
Education : Bachelor in Computer Science (2010-2015). Department of Informatics and Telecommunications, university of Peloponnese

WEB DEVELOPER

Highly motivated and adaptable web developer (mainly FE with touches in BE), with professional experience in JavaScript and TypeScript, specialising in developing scalable, high-performance web applications. Expertise in building front-end solutions using modern technologies – React, Next.js. Demonstrated ability to lead project setup, architecture design, and the integration of diverse libraries and frameworks to ensure seamless user experiences and robust system performance. Passionate about learning and looking for new opportunities to improve BE and FE skills.

SIGNATURE STRENGTHS & EXPERTISE

Mentorship Continuous Learning CRUD Operations Web Development	Agile Methodologies Project Management Effective communication Component-based Development	User Experience (UX) UI/UX Implementation Code Optimization Software Performance
Front-end Architecture	Responsive Design	Problem-Solving

EXPERIENCE

NOESIS SOLUTIONS – MATHPRO Sep 2024 – Present

Lead Front End Developer – Remote (Sep 2024 – Present) - (Contract)

Developed and maintained the entire front end infrastructure for a specialised **educational platform** designed to support students with dyscalculia, ensuring a seamless user experience and responsive design. Collaborated with the designer to implement UI/UX designs into interactive, functional web pages. Wrote clean, maintainable, and efficient code to build intuitive user interfaces. Ensured cross-browser compatibility and responsiveness to optimise the application for various devices and screen sizes.

- Made critical architecture decisions to optimise system performance and align with product goals.
- Created a robust mechanism to consume REST apis for better error handling and code expandability.
- I bridged the gap between design and engineering, ensuring pixel-perfect, accessible UIs
- Technology Range: Typescript | Next js | REST | JWT| Zod | Tanstack query | Mantine

FLARMIO – ROOMISMO Mar 2022 – AUG 2024

Front-end Developer – Remote (Sep 2022 – Aug 2024)

Implemented a **monorepo** for two front end applications for ROOMISMO a digitalisation product tailored for the HoReCa sector. The first one was a **management dashboard panel** and the second one a **web(mobile-capacitor)** fully mobile design app, Developed and maintained the front-end using **Next js** ensuring seamless functionality and user experience. Utilised **Typescript, GraphQL, Tanstack Query**, and other technologies to build scalable, maintainable, and efficient systems. Collaborate in cross-functional teams to ensure smooth delivery of features and functionality. Ensure adherence to best practices in code quality, testing, and documentation

- Integrated front-end with back-end services through GraphQL APIs to enable dynamic content and real-time functionality.
- Implemented a more consistent way to handle graphql errors (in contrast to 200ok response)
- Implemented front-end features using React, following best practices to enhance scalability and performance.
- Conducted thorough testing to ensure the front-end functionality was bug-free and met high-quality standards.
- Trained 4 junior developers to be part of the team.
- Technology Range: Typescript | Next js | Styled Components | Tanstack query | Chakra ui | GraphQL | Jest | Capacitor

STUDY HALL LTD– STUDYHALL AI

Jan 2021 – Feb 2022

Front-end Developer – Remote (Jan 2021 – Feb 2022)

*At Study Hall, i started my journey as a front end developer. I contributed to implementing the FE infrastructure of an **educational platform**, designed to prepare children for school entrance exams. Had to dive into whole different areas of the project such as tech, design and business refinements.*

- Converted business needs to User stories and *translated User stories to technical specification tickets using Jira.*
- Worked closely with the CEO of the company to understand the business model and perform demos for the investors of the product.
- Worked with the design team to implement a design system that was adapted to the whole project.
- Had an excellent cooperation with the Senior BE team that helped me quickly grasp the whole development process and expand my full-stack overview.
- Technology Range: Typescript | Next js | Styled Components | REST | Session | Chakra ui

TECH AND CUSTOMER SUPPORT

Nov 2015 – Oct 2021

Tech and customer support – On site (Nov 2015 – Oct 2021)

I have worked in a lot of IT sectors all these years. From Server setup to fixing computers and phones. From tech support to back office logistics. All those years helped a lot with soft and communication skills that are really helpful in development circle.

PROJECTS

[Glekas-Hearing-Fullstack](#)

Technology Range: Next.js | Tanstack Query | Typescript | Amazon S3 | MongoDB | JWT | Server-side

- Developed a store management system for a hearing aid retail store. Has a fully customised admin panel so the admin user can update the content at any time
- Achieved a really good SEO performance that helped the site to be the first in google search without paying.

[Personal-Site](#)

Technology Range: Next js | Css modules | Typescript | Responsive

- *A simple but beautiful site with future potential for blog and extra personal details for portfolio*

[Enospace](#)

Technology Range: Next js | Css modules | Typescript | Responsive

- Implemented a multi page fully responsive marketing template web site for display purposes.
